## **SECTION 2: Hazards identification**

#### 2.1 Classification of the substance or mixture

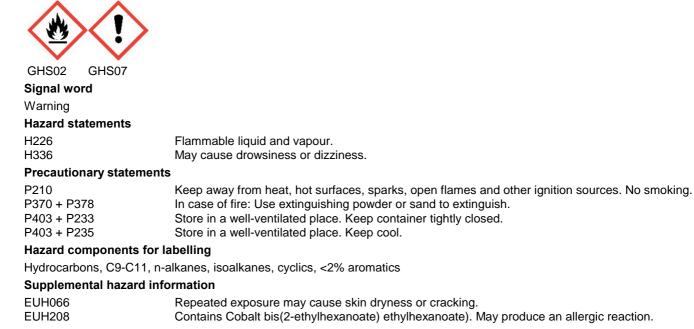

#### Classification according to Regulation (EC) No 1272/2008 [CLP]

The mixture is classified as hazardous according to regulation (EC) No 1272/2008 [CLP]. Flam. Liq. 3; flammable liquids; H226 Flammable liquid and vapour. STOT SE 3 Narcotic effects; STOT-single exposure; H336 May cause drowsiness or dizziness.

#### 2.2 Label elements

#### Labelling according to Regulation (EC) No. 1272/2008 [CLP]

#### Hazard pictograms

## 2.3 Other hazards

The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII.

263.13.740PROline-paint industrial floor coatingVersion 6.0Revision date 03-Feb-2023

Print date 14-Feb-2023

## **SECTION 3: Composition/information on ingredients.**

#### 3.2 Mixtures

#### Description

Preparation of synthetic binders, pigments and solvents

## **Hazardous ingredients**

CAS No. EC No. Index No.	Substance name REACH No. Classification according to Regulation (EC) No 1272/2008 [CLP]	weight-%

#### Remark

Full text of H- and EUH-statements: see section 16.

#### **SECTION 4: First aid measures**

#### 4.1 Description of first aid measures

#### General information

In all cases of doubt, or when symptoms persist, seek medical advice. In case of unconsciousness give nothing by mouth, place in recovery position and seek medical advice.

#### Following inhalation

Remove casualty to fresh air and keep warm and at rest. In case of irregular breathing or respiratory arrest provide artificial respiration.

#### Following skin contact

Remove contaminated, saturated clothing immediately. After contact with skin, wash immediately with plenty of water and soap. Do not use solvents or thinners.

#### After eye contact

Rinse cautiously with water for several minutes. Remove contact lenses, if present and easy to do. Continue rinsing. Seek medical advice immediately.

#### **Following ingestion**

If swallowed, rinse mouth with water (only if the person is conscious). Seek medical advice immediately. Keep victim calm. Do NOT induce vomiting.

#### Self-protection of the first aider

First aider: Pay attention to self-protection!

#### 4.2 Most important symptoms and effects, both acute and delayed

#### Symptoms

In all cases of doubt, or when symptoms persist, seek medical advice.

#### 4.3 Indication of any immediate medical attention and special treatment needed

First Aid, decontamination, treatment of symptoms.

#### **SECTION 5: Firefighting measures**

#### 5.1 Extinguishing media

263.13.740	PROline-paint industrial floor coating	
Version 6.0	Revision date 03-Feb-2023	Print date 14-Feb-2023

#### Suitable extinguishing media

alcohol resistant foam, Carbon dioxide (CO2), Powder, spray mist, (water)

Unsuitable extinguishing media

Strong water jet

## 5.2 Special hazards arising from the substance or mixture

Dense black smoke occurs during fire. Inhaling hazardous decomposing products can cause serious health damage.

#### 5.3 Advice for firefighters

Provide a conveniently located respiratory protective device. Cool closed containers that are near the source of the fire. Do not allow water used to extinguish fire to enter drains, ground or waterways.

#### **SECTION 6: Accidental release measures**

#### 6.1 Personal precautions, protective equipment and emergency procedures

Ventilate affected area. Do not breathe vapours.

#### 6.2 Environmental precautions

Do not allow to enter into surface water or drains. If the product contaminates lakes, rivers or sewages, inform competent authorities in accordance with local regulations.

#### 6.3 Methods and material for containment and cleaning up

#### For containment

Isolate leaked material using non-flammable absorption agent (e.g. sand, earth, vermiculit, diatomaceous earth) and collect it for disposal in appropriate containers in accordance with the local regulations (see section 13).

#### For cleaning up

Clean using cleansing agents. Do not use solvents.

#### 6.4 Reference to other sections

Safe handling: see section 7 Personal protection equipment: refer to section 8 Disposal: see section 13

## **SECTION 7: Handling and storage**

## 7.1 Precautions for safe handling

#### Advices on safe handling

Avoid contact with skin, eyes and clothes. Avoid respiration of swarf. Personal protection equipment: see section 8 Do not empty containers with pressure - no pressure vessel! Always keep in containers that correspond to the material of the original container. Follow the legal protection and safety regulations.

#### Advices on general occupational hygiene

When using do not eat, drink or smoke.

#### 7.2 Conditions for safe storage, including any incompatibilities

#### Requirements for storage rooms and vessels

Storage in accordance with the Ordinance on Industrial Safety and Health (BetrSiVO). Keep container tightly closed. Do not empty containers with pressure - no pressure vessel! Smoking is forbidden. Access only for authorised persons. Store carefully closed containers upright to prevent any leaks.

#### Hints on joint storage

Keep away from strongly acidic and alkaline materials as well as oxidizers.

Storage class LGK3 - Flammable liquids

#### Further information on storage conditions

Keep container tightly closed. Smoking is forbidden. Access only for authorised persons. Store carefully closed containers upright to prevent any leaks. Store in a well-ventilated and dry room at temperatures between 5 °C and 35 °C.

#### 7.3 Specific end use(s)

Observe technical data sheet.

## **SECTION 8: Exposure controls/personal protection**

#### 8.1 Control parameters

#### **Occupational exposure limit values**

# 8.2 Exposure controls

Provide good ventilation. This can be achieved with local or room suction.

## Personal protection equipment

#### **Respiratory protection**

In case of inadequate ventilation wear respiratory protection.

#### Hand protection

Suitable material: NBR (Nitrile rubber) Thickness of the glove material >= 0,4 mm Breakthrough time >= 480 min

For special purposes, it is recommended to check the resistance to chemicals of the protective gloves mentioned above together with the supplier of these gloves. Observe the instructions and details for use, storage, maintenance and replacement provided by the protective glove manufacturer. Penetration time of glove material depending on intensity and duration of exposure to skin. Recommended glove articles: EN ISO 374

## Skin protection

Barrier creams can help protecting exposed skin areas. In no case should they be used after contact.

#### Eye/face protection

Eye glasses with side protection: EN 166

#### **Body protection**

When handling with chemical substances, protective clothing with CE-labels including the four control digits must be worn. Antistatic clothing including shoes are recommended.

#### Environmental exposure controls

Do not allow to enter into surface water or drains.

## **SECTION 10: Stability and reactivity**

#### 10.1 Reactivity

No specific test data related to reactivity available for this product or its ingredients.

## 10.2 Chemical stability

Stable when applying the recommended regulations for storage and handling. Further information on correct storage: refer to section 7.

#### **10.3 Possibility of hazardous reactions**

Keep away from strong acids, strong bases and strong oxidizing agents to avoid exothermic reactions.

#### 10.4 Conditions to avoid

Stable when applying the recommended regulations for storage and handling. Further information on correct storage: refer to section 7. Hazardous decomposition byproducts may form with exposure to high temperatures.

## 10.5 Incompatible materials

No further relevant information available.

## **10.6 Hazardous decomposition products**

Hazardous decomposition byproducts may form with exposure to high temperatures e.g.: Carbon dioxide (CO2), Carbon monoxide, smoke.

## **SECTION 11: Toxicological information**

#### 11.1 Information on hazard classes as defined in Regulation (EC) No 1272/2008

263.13.740 Version 6.0	PROline-paint industrial floor coating Revision date 03-Feb-2023	Print date 14-Feb-202
Acute toxicity	-	
Based on available	e data, the classification criteria are not met.	
<b>Cobalt bis(2-ethy</b> LD50: oral (Rat): 7	<b>hexanoate) ethylhexanoate)</b> 08 mg/kg	
Skin corrosion/iri	itation	
Based on available	e data, the classification criteria are not met.

STOT-repeated ex	(posure	
Based on available	e data, the classification criteria are not met.	
Aspiration hazard		
Based on available	e data, the classification criteria are not met.	
Practical experier	nce/human evidence	
	components above the MWC-value can lead to health damage, e.g. irr as well as damage to the liver, kidneys and the central nerve system.	

respiratory organs, as well as damage to the liver, kidneys and the central nerve system. Indications for this are: Headache, Dizziness, fatigue, amyosthenia, Dizziness, in serious cases: unconsciousness. Solvents may cause some of the aforementioned effects through skin resorption. Repeated or prolonged contact with the preparation may cause removal of natural fat from the skin resulting in non-allergic contact dermatitis and/or absorption through skin. Splashing may cause eye irritation and reversible damage.

# 11.2 Information on other hazards

#### Endocrine disrupting properties

This product does not contain a substance that has endocrine disrupting properties with respect to humans as no components meets the criteria.

## **SECTION 12: Ecological information**

#### 12.1 Toxicity

Based on available data, the classification criteria are not met.

Acute (short-term) toxicity to crustacea Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics LC50: > 0,002 mg/L (96 h)

Chronic (long-term) toxicity to aquatic invertebrate NOELR: 1 mg/L (21 d)

**Toxicity to microorganisms** 2 (5 h)

#### 12.2 Persistence and degradability

No information available.

#### 12.3 Bioaccumulative potential

Partition coefficient: n-octanol/water > 0,66 (ethyl acetate)

Partition coefficient: n-octanol/water = 1,85 (n-butyl acetate)

## 12.4 Mobility in soil

\*

No information available.

#### 12.5 Results of PBT and vPvB assessment

The substances in the mixture do not meet the PBT/vPvB criteria according to REACH, annex XIII.

#### 12.6 Endocrine disrupting properties

This product does not contain a substance that has endocrine disrupting properties with respect to non-target organisms as no components meets the criteria.

#### 12.7 Other adverse effects

263.13.740	PROline-paint industrial floor coating	
Version 6.0	Revision date 03-Feb-2023	Print date 14-Feb-2023
No information available.		

## **SECTION 13: Disposal considerations**

#### 13.1 Waste treatment methods

## Product/Packaging disposal

Do not empty into drains; dispose of this material and its container in a safe way. Waste disposal according to directive 2008/98/ EC, covering waste and dangerous waste.

#### Waste codes/waste designations according to EWC/AVV

080111\* - Waste paint and varnish containing organic solvents or other dangerous substances

#### Other disposal recommendations

Non-contaminated packages may be recycled. Vessels not properly emptied are special waste.

3
