WALL UNIT WITH CLICK SYSTEM

Assembled with

Click Furniture Technology

CLICK!

With the Threespine® click system, our wooden cabinet furniture can be easily assembled in seconds and without tools. All you need are your hands.

Click Furniture Technology

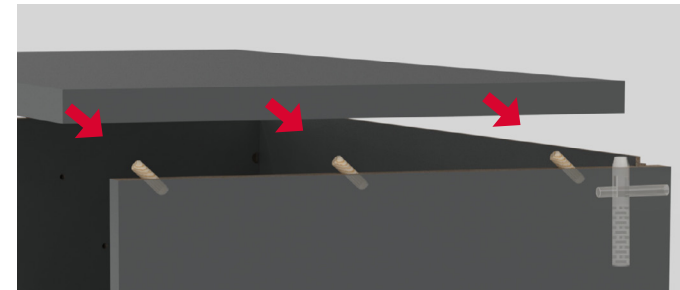

Threespine® is a patented technology invented by Vålinge Innovation AB. The Threespine® word mark and logo are registered trademarks for click furniture technology owned by Vålinge Innovation AB and any use of such marks is under license.

Cabinet assembly with one click:

The two main features of the Threespine click system are its inclined dowels and a flexible plastic spring.

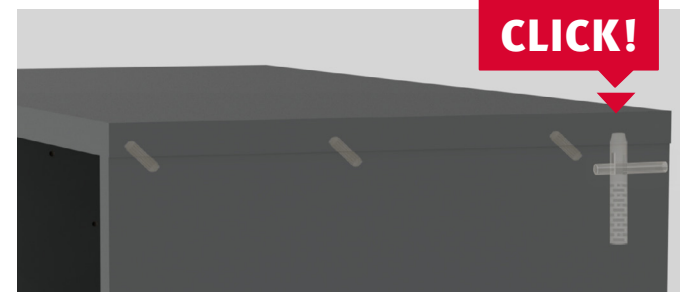

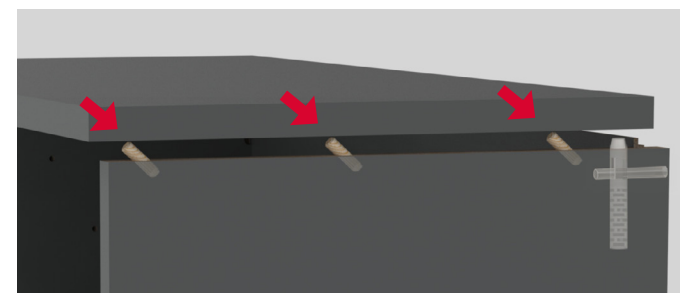

The side and bottom simply “click” into each other. In doing so, the inclined dowels guide both elements and plastic springs snap into place to fix them in the final position. The back wall is braced from the inside with a plastic clamp.

QUICK AND EASY (DIS)ASSEMBLY WITH CLICK SYSTEM

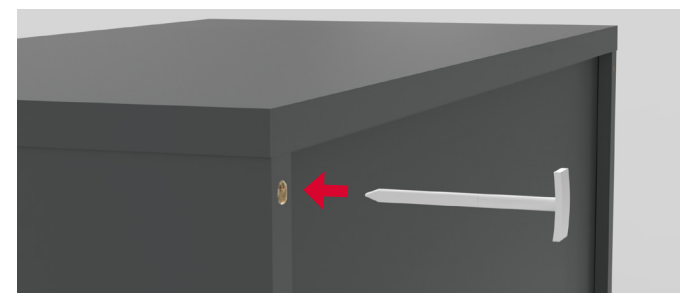

Assembly:

→ Push the top panel onto the inclined dowels at an angle from the front.

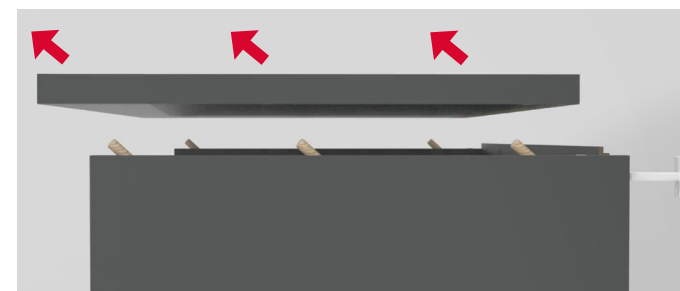

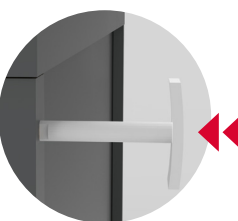

→ Press firmly so that the plastic spring engages.

Disassembly:

→ Insert the pin into the opening on the back and press firmly so that the plastic spring is carefully pressed inwards.

→ Pull the top panel off at an angle towards the front.
