

# The right mirror for every application

## Applications

- For use on public roads / company premises
- For monitoring entrances, production lines and theft prone indoor and outdoor areas
- In storage aisle crossings and storage areas

Refer to our pictograms to help you find the appropriate mirror.

## Material

**Acrylic glass mirrors** are 70% more impact resistant than glass (according to EN-ISO 179-1). Very good optical quality. Extremely durable, even when subjected to fluctuations in temperature and exposure to the elements.

**Sekurit safety glass mirrors** are distinguished by their good optical quality. Resistant to scratches and contamination. Glass crumbles if broken.

Extremely durable, even when subjected to fluctuations in temperature, exposure to the elements and chemicals.

**Mirrors made of chrome nickel steel** offer the highest level of resistance to fire and extreme temperatures.

With a 5 year warranty and the GS testing seal, we guarantee you the very best in quality.
