4 Steel cylindrical roller (max. load 150 kg)

5 Plastic flanged roller (max. load 65 kg)

6 Steel flanged roller (max. load 150 kg)

Roller tracks

Optionally available with cylindrical or flanged rollers

- Optimise the flow of goods in the company and in production
- Easy to assemble and highly versatile

Roller tracks transport goods reliably and safely from the point of departure to the final destination. They are used in carton flow racking systems, on packaging and order picking tables, or as a link between two different work stages.

Cylindrical rollers are suitable for almost all types of storage units, with everything from a small crate to a pallet able to be conveyed depending on the load bearing capacity.

Individual custom made solutions are available on request.

Flanged rollers feature a pronounced side edge and can e.g. transport packages over a pitched flow bed without any danger of them falling off the side.

Roller spacing		mm	33	50
1	plastic	1000 mm	Ref. 499 476-2G	499 477-2G
			€ 7,69	6,49
