

Conveyor rollers

- Made of steel or plastic tubing
- Bearing case made of steel or plastic

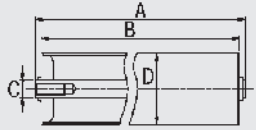

A wide range of models to accommodate virtually any application.

Custom models

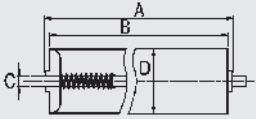

Stainless steel conveyor rollers, steel coated with PVC, zinc plated model, with stainless steel bearing – available in additional length and diameters upon request.

With threaded axle:
A = installation length, B = casing length, C = axle Ø, D = roller Ø

With internal thread:
A = installation length, B = casing length, C = axle Ø, D = roller Ø

With sprung axle:
A = installation length, B = casing length, C = axle Ø, D = roller Ø

The indicated max. loads apply only with load distributed equally across the entire casing length.

1 Steel conveyor rollers

- Max. load up to 120 kg

Durable and heavy duty steel construction

Tubular steel running surface, bearing case made of steel with cup and cone ball bearings. Available with threaded axle or sprung axle.

2 Steel conveyor rollers

- Max. load up to 250 kg

Durable and heavy duty steel construction

Tubular steel running surface, plastic bearing case, deep groove ball bearings with labyrinth seal, axle with internal thread.

3 Plastic conveyor rollers

- Max. load 10 kg

For light duty roller conveyors and flow shelves

Plastic coating, ideal for sensitive goods and components

Plastic running surface, shock resistant, ball bearing mounted with sprung axle, Ø 8 mm. Bearing case made of plastic.

4 Plastic conveyor rollers

- Max. load 10 kg

For light duty roller conveyors and flow shelves

Plastic coating, ideal for sensitive goods and components

Plastic running surface, shock resistant, ball bearing mounted with sprung axle, Ø 6 – 10 mm. Bearing case made of plastic.

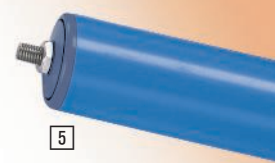

5 Plastic conveyor rollers

- Max. load up to 90 kg

For light duty roller conveyors and flow shelves

Plastic coating, ideal for sensitive goods and components

Plastic running surface, shock resistant. Bearing case made of plastic with grooved ball bearings and labyrinth seals. Sprung axle, Ø 10 mm.
