

With dual frame supports and side guide rails (accessories)

Heavy roller conveyors

Transport flow without drive due to slight pitch of approx. 2 – 5 %

U-profile frame made of zinc plated steel 25 x 100 x 25 x 2 mm, with robust cross pieces. Ball bearing mounted, zinc plated steel rollers, Ø 50 mm, with sprung axle, Ø 12 mm. Curves with split rollers.

Static maximum load 400 kg per metre of track with supports spaced 1 m apart.

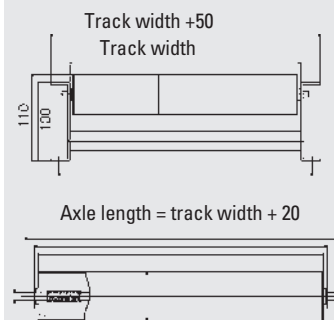

Designing your conveyor

Assemble required conveyor length from individual sections. Determine required number of straight and curved sections.

Determine track width according to largest dimension of goods to be transported and axle spacing of the rollers according to smallest dimension of goods to be transported.

Alternative versions, 45° curves and passages available on request.

CAD Service

We can supply any type of conveyor belt on request. Please request an individual offer.
