

# Stacking containers

Long goods frames are available in additional sizes on request.

A crane lifting beam for moving the long goods frames vertically by crane can be found on page 362.

## Storage and stacking containers

- Simplifies material flow and storage
- Robust steel construction for stability and load bearing capacity
- Optimum utilisation of space, as multiple units can be stacked
- Can be transported with forklift or crane with crane harness

### 1 Long goods frames

- Highly versatile
- Can be easily filled from all sides
- Can be transported by crane (only with vertical crane harness)

Torsion-free, particularly buckle resistant corner post construction. The sheet steel base made of trapezoidal profile is in a 50 mm U-shaped iron frame. Reinforced with large connection plates. Stacking corners with crane eyelets.

### 2 Long goods frames

- Very robust wall design
- Can be transported by crane (only with vertical crane harness)

Torsion-free corner post construction. Base and longitudinal walls made of profiled sheet steel.

Reinforced rim. Stacking corners with crane eyelets.

### 3 Stacking containers

- Large opening for filling and removal
- Stacking rim for secure stacking

Torsion-free, profiled sheet steel construction.

Stacking feet without crane eyelets.
