

Absorbent sheeting

Effective absorption and containment of spillages – preventively or in emergencies

- Extremely absorbent – minimal consumption
- Dust free, hardwearing, tear resistant, highly absorbent
- Made of 100% polypropylene – simple and cost effective to dispose of

Formats

Sheets

Perforated in centre.

Rolls

- Width 400 mm: perforated every 500 mm
- Width 800 mm: perforated every 500 mm across and down the centre

Liquids to be absorbed / versions

Oil (blue)

For oil, petrol, diesel etc. Water repellent, floats on water. Ideal for separating oil/water.

Universal (grey)

For coolants, solvents, lubricants, paints, oils, water, weak chemicals etc. (absorbs all liquids).

Chemicals (yellow)

For acids, alkaline solutions, corrosive media, alcohol etc.

Application / grades

1 FIRST – 1-ply

For basic or single use. Ideal for emergencies and under machines. Open, absorbent fine fibre texture on both sides.

Medium for small quantities of liquid.
Heavy for large quantities of liquid.

2 BASIC – 2-ply

Ideal as a work mat, under machines and for spillage emergencies. For standard duty applications. Highly absorbent.

Reinforced at top – hardwearing, fuzz free and smooth. Open, absorbent fine fibre texture on bottom.

3 PRO – 3-ply

For prolonged, heavy duty use and fuzz free applications, e.g. for cleaning parts.

Reinforced at top and bottom – hardwearing on both sides, fuzz free and smooth, very durable, highly absorbent, tear resistant.

4 PRO Plus – 3-ply

Ideal as a work mat, in front of machines, as a mat in walkways. Can be walked on and driven on.

Additionally reinforced at top – hardwearing, fuzz free and smooth, impermeable underside, non-slip film.

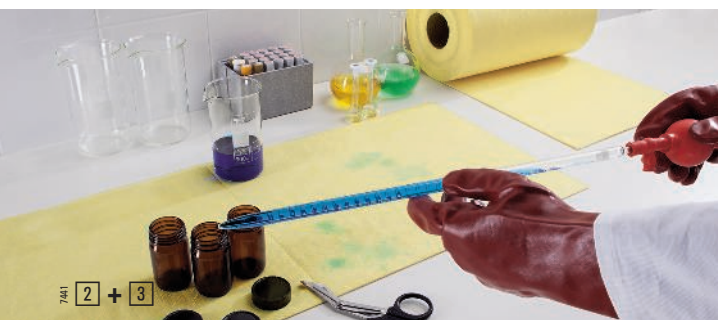

Please request a free sample of absorbent sheeting for testing. Please specify model: oil, universal or chemicals.
