

1–3 | SEALKID film sealing devices

- Easy to use and cost effective
- Easy sealing and cutting of film pouches and sleeves
- With time limit switch and cutter

Film thickness max.: 2 x 0.2 mm.
Voltage: 230 V.

5–6 | MAGNETA film sealing devices

- High-performance industrial device, adjustable sealing and cooling times
- Particularly easy to operate and ergonomically shaped cutting unit, incl. magnetic latch
- Ideal for serial production – very easy to use

Film thickness max.: 2 x 0.15 mm. Height: 250 mm. Width: 190 mm.

7

7–9 | ECO impulse sealing devices

- Practical basic sealing device – easy operation
- The cutter allows bags of differing lengths to be manufactured from a tubular film
- With time switch

Film thickness max.: 2 x 0.15 mm. Width: 110 mm.
