

Protection against theft and fire

Protect your valuable items, such as important documents, data carriers, cash, cheques, keys etc. from break-ins, fire and from unexpected access by unauthorised individuals.

All safes are fitted with the corresponding certification plates.

VDMA security levels A and B

Safes are manufactured in accordance with specific design criteria as defined under VDMA 24992 (May 1995 edition). (The corresponding design sheet was retracted by the VDMA on 31.12.2003 and never replaced.)

In order to meet European safety requirements, these cupboards have been replaced by security cupboards with tested and certified burglary protection in accordance with Euro standard EN 14450 S1 and S2.

The respective insurance numbers (commercial and private) can be obtained in consultation with the insurance company.

Burglary protection to European standard EN 14450

The safes have been tested and certified to burglary levels S1 (200 SU) and S2 (400 SU). (SU = security units)

The previous requirements for VDMA A and B cupboards are effectively fulfilled and far exceeded due to significant technical improvements:

- Lock bolts on 3 sides via door handle
- Hook-in profile / protected hinges
- VdS class I dual bit security lock
- Lock with anti-penetration plate
- Bolts with manganese armour plating
- Anchoring points in the base and rear panel

Ask your insurance company for the exact insurance sums.

Our service for "heavy jobs"

As you know we deliver all items free. You receive the goods at the agreed address – at ground level with no steps. You deal with the rest yourself – very simple.

What about large, bulky and above all, heavy safes?

For these cases our **safe transport service** can be of assistance.

We deal with transporting your new safe to the point of use. To exactly where you need it!

Provided the conditions on location allow it:

Stairs and floors should have sufficient load-bearing capacity, the stairs should be wide enough and no additional work should be required, such as propping up stairs or the use of a crane.

The disposal of the packaging is also included in the price.

In the event that a site inspection is required or requested before delivery, this is not included in the price.

Safe transport service, delivered free to point of use, price per kilogram

Ref. 977 400 6G € on request

Which valuable items do you want to protect?

How large does your safe need to be?

Where would you like to locate your safe?

Door hinges on right or left at no extra cost.

Burglary protection to European standard EN 1143-1

The safes have been tested and certified against burglary.

They are subjected to constant inspection.

Safes in classes I or higher are generally multiple walled, defined burglary protection is determined using resistance units (RU).

We are happy to offer other resistance grades and protection classes up to class V upon request.

	Commercial	Domestic
Class I with 30/50 RU according to EN 1143-1	up to approx. €20,000.00	up to approx. €65,000.00

Fire protection to EN 15659 and EN 1047-1

EN 15659 LFS 30 P

These safes have been subjected to a 30 minute fire resistance test at 840 °C.

EN 1047-1 S 60 P, S 120 P

The respective safes have been subjected to a one hour or two hour fire resistance test at 1090 °C, as well as a slump test from a height of 9.15 m.

UL 72 60 P

These safes have been subjected to a one hour fire resistance test at 1090 °C.

	Tested fire resistance
Fire protection to EN 15659 LFS 30 P	30 minutes for documents
Fire protection to EN 1047-1 S 60 P	1 hour for documents
Fire protection to EN 1047-1 S 120 P	2 hours for documents
Fire protection to UL 72 60 P	1 hour for documents

Please note: to be able to obtain complete insurance coverage, all safes that are lighter than 1000 kg must be installed in accordance with the manufacturer's installation instructions. On request, on-site safe anchorage is included at extra cost.

Don't know what to do with your old safe?

Take advantage of our safe disposal service!

We will pick-up and dispose of your old safe for you based on the weight and the site-specific requirements.

Min. safe weight	kg	0	101
Max. safe weight		100	500
	Ref.	616 130 6G	616 131 6G
	€	on request	on request

– from 501 kg on request

Some safes may contain chemical substances and must therefore be handled as special waste, and disposal must be agreed individually.
